Singapore, Singapore | +65 9102 7060 | raashid06@gmail.com | linkedin.com/in/raashid-niyas

Full-stack software engineer with 7 years of experience architecting and delivering secure, scalable solutions in the healthcare and enterprise sectors. Expert in .NET Core, C#, React, and cloud technologies (AWS and Azure). Passionate about leading technical initiatives, mentoring teams, and building user-centric applications that improve operational efficiency and end-user experience.

Technical Skills

Languages: C#, JavaScript, TypeScript, SQL, PL/SQL

Frameworks & Libraries: .NET Core, .NET 8, React, Angular, WPF, WCF, IdentityServer4

Cloud & DevOps: AWS Serverless, Azure, Azure DevOps, Lambda, Azure Functions, Azure blob storage, S3, API Gateway, CloudFront,

Tools & Others: SSIS/SSRS, Selenium, BrowserStack, Umbraco CMS, Microsoft Graph API

Professional Experience

Senior Software Engineer

Synapxe, Singapore | Dec 2022 – Present

- Developed clinical management systems and electronic medical records (EMR) solutions for GPs and clinics in Singapore.
- Contributed to the HealthierSG program by implementing Phase 1 features in the GPConnect application.
- Designed, developed, and maintained new features, bug fixes, and enhancements for a Windows application using WPF, along with backend services built on WCF.
- Developed, maintained, and tested SSIS/SSRS packages for report generation.
- Acted as a mentor to new developers, facilitating smooth onboarding and fostering knowledge sharing within the team.
- Successfully led the tech refresh of the existing system (Upgrade IIS, SQL, Windows Server 2022).
- Played a key role in developing a proof of concept for the revamped GPConnect application.
- Designed backend architecture for the new GPConnect application revamp.
- Actively participated in architecture design and planning meetings.
- Leveraged AWS Serverless resources to architect scalable and efficient infrastructure.
- Contributed to both frontend design and backend API framework development for the revamped application.
- Technology utilized: React, .NET 8, Material UI, SQL Server, AWS Serverless, .NET Framework, WPF/WCF, SSRS/SSIS,

Senior Software Engineer

Ascentic, Sri Lanka | April 2022 – Dec 2022

- Led UI/ Developed microservices and APIs using .NET Core and Azure Functions.
- Actively participated in architecture design and planning meetings.
- Worked with Microsoft Graph API and developed extensions for Microsoft Teams.
- Customized Umbraco CMS to meet individual client needs.
- Sole offshore team member, collaborating directly with the on-site team for seamless development and communication.
- Led internal knowledge-sharing sessions to enhance team expertise.
- Conducted knowledge-sharing sessions for universities to bridge industry and academia.
- Introduced innovative ideas to improve the efficiency and usability of in-house products.

Software Engineer

Ascentic, Sri Lanka | March 2021 – April 2022

- Led UI/ Developed microservices and APIs using .NET Core and Azure Functions.
- Developed backend services and reactive, responsive frontend views for a healthcare service provider specializing in vaccinations and tests.
- Designed and implemented authentication and authorization mechanisms using IdentityServer 4, OAuth 2.0 with BankID integration.
- Maintained high code quality and best practices in backend development.
- Handled authentication-based routing in the frontend project using React.js.
- Technologies utilized: .NET Core, C#, React.js, Angular, SCSS, Azure DevOps, Azure Cloud, Azure Functions, Azure Blobs, SendInBlue for email services

Associate Software Engineer

Virtusa, Sri Lanka | Dec 2019 – March 2021

- Developed new features and delivered solutions in an agile environment using C#, ASP.NET, Knockout.js, jQuery, JavaScript, Kendo UI, and MS-SQL.
- Played a key role in a report generation project within the real estate domain, contributing to UI design and backend API development.
- Refactored complex legacy code into modern frontend code, improving efficiency and maintainability.
- Played an important role within a small, agile team of developers, fostering collaboration and ensuring project success.

Software Engineer - Intern

IFS, Sri Lanka | Nov 2018 – July 2019

- Converted a stand-alone ERP system into a web-based ERP solution.
- Gained experience in transforming financial-related forms and views into web-based forms.
- Utilized C# and PL/SQL extensively during the conversion process.

Automation Associate Specialist

Virtusa, Sri Lanka | September 2017 – Nov 2018

- Primarily involved in developing and testing automated test scripts within an agile environment (Sprint).
- Developed and deployed test cases using Java and Selenium, with a focus on cross platform testing and deployment using BrowserStack and GoCD.
- Played a key role in the A+E Network project, serving as the 2nd level lead, overseeing the execution and management of test automation processes.

Education

- **Bachelor's in Information Technology** | University of Colombo School of Computing (UCSC) - 2019
